

Cyber Crime Trends – 2020 Update and Top 10 Defensive Measures

**Mark Eich, CPA, CISA, GCSL,
Principal-Cybersecurity, CLA**

April 21, 2020 | 10:00 - 11:00 a.m. | Webinar

Join Envision Greater Fond du Lac and CLA (CliftonLarsonAllen LLP) for a complimentary webinar on cybersecurity. Years of intrusion analysis have given us insight into the specific objectives and tactics that hackers use when committing cybercrime. This session will discuss those tactics and provide very pragmatic defensive measures linked directly to them. We will cover how to harden your network, train your employees, monitor your network for breaches, handle online banking securely and other key topics.

Mark Eich, CPA, CISA,
GCSL, Principal-
Cybersecurity, CLA

About the speaker: Mark is the founding Principal of the Information Security Services Group at CLA. He has over 30 years' experience in auditing and technology consulting. In this position, he has actively led many IT audits and security assessments for clients in a range of industries and with a diversity of operating environments. He leads a team of technology and industry specialists in an efficient approach to provide security analyses that are balanced with business needs. Information security assessments include: Network penetration services; Internal network security assessments; Incident response and electronic forensics services; IT audit; SOC 1 and SOC 2; Information security policies and procedures; assessment / consulting; PCI compliance; and, HIPAA / HiTrust
